

D & T Series

Bi-directional, High Cycle, Zero Leak Ball Valves

HOKE's DL/TL ball valves are uni-directional, high cycle valves that exceed 100,000 cycles with zero seat leakage.** In applications where bi-directional flow is required, HOKE D and T series valves exceed 50,000 cycles. HOKE ball valves can be ordered in brass, 316 stainless steel or Monel® materials with a manual handle as standard.

For remote actuation, factory-assembled HOKE Space Saver™ Actuators are available. D, DL, T and TL series valves can be ordered with welded end fittings to prevent accidental disassembly or with gasketed end fittings, if valve rebuild becomes necessary.

Features & Benefits

Delta stem seal (D & DL)

- Improved cycle life
- No packing adjustment required
- Rated to 6000 psig (414 bar)
- Low operating torque for ease of operation

Spring-loaded PTFE seal (T & TL)

- Compensates for wear and thermal cycling with zero leakage, providing excellent durability and reliability.

Choice of end-fittings for versatility

- 70 Series – welded
- 71 Series – gasketed

Live-loaded seats (DL & TL)

- Compensates for wear and thermal cycling with zero leakage, providing excellent durability and reliability.
- Ensures leak-tight performance over entire pressure range simplifying ball valve specification and installation, saving time and expense.

Static –grounded stem

- Prevents static discharge for added safety

Quarter-turn handle

- Quick on/off simplifies operation and saves time.
- Directional handle provides quick visual indication of orifice, improves operator efficiency and safety.
- Special High Tolerance NPT Thread

HOKE Space Saver™ Pneumatic Actuators

For remote control of HOKE D/DL/T/TL ball valves, order a pneumatic actuator. Pneumatically-actuated ball valves incorporating HOKE's Space Saver™ actuators can be used for both double acting and spring return applications. D/DL/T/TL ball valves may be ordered from the factory pre-assembled with HOKE Space Saver™ actuators. See page 12 for basic ordering information. Electric actuators are also available. Electric actuators are supplied in either 115 VAC or 24 VDC with weatherproof or explosion-proof housings. Refer to HOKE's *Actuator Catalog* (79005) or contact your local factory-authorized distributor for more details.

Pneumatic Actuator Specifications

MAXIMUM OPERATING AIR PRESSURE	125 psig (9 bar)
MINIMUM OPERATING AIR PRESSURE	40 psig (3 bar)
TEMPERATURE RANGE*	0° F to +400° F (–18° C to +204° C)

* Maximum valve temperature is 350° F, depending on seat, seal, and washer material selected. See page 11 for details.

How to Order: Standard Valves

Use the following list to order standard valves that are readily available from the factory. If your application requires a customized valve, use the "Build to Order" matrix on page 11.

Handle Locking Kit

Safety lockout kits are available for applications which must conform to Code of Federal Regulations 29CFR Part 1910, OSHA Safety and Health Act and other international regulations. Valves can be locked in either an opened or closed position with the stainless steel upper and lower locking plates. Lock with readily available padlocks or commercially available multiple lockout devices. Locking kits include the locking plates and assembly instructions. To order a safety lockout kit, specify kit 7100K18.
